Making Employees Available for Training

This-list-of-problems-lu-fallay commandivey-bath it-disufacing the Office of Training in the clearly defined during the periode profile; was the lack of students for certain specialized courses in fields where the need for trained personnel was most urgent. The Management Staff pointed out the need for a firm Agency policy, supported by implementing directives, which would define the specialized training which the Agency considers necessary for each category of position in the various major fields of Agency activity or as a prerequisite to overseas assignment, with some means devised to provide a reasonwhiform flow of students through the training process.

gooded that the Office of the Director initiated the 5% quota policy in September 1954 which required 5% of on-duty civilian staff employees to be in training status at all times. This requirement applied at first to the DD/P area but it was later excended to all Headquarters civilian staff employees. 2 When he issued this recommendation, General Cabell recognized the limitations of the scheme. He wrote: 3

7. The quota system is a short-range, probably temporary device for facing the fact that the Agency has not trained and is not now training enough people,

intensively enough, to carry out our grave and increasing responsibilities. It will operate until further notice, but should be recognized as only the first stage of a strenuous campaign to develop our capabilities. The quotas should be superseded by manpower and career planming which identifies 1) requirements of future operational plans for specific numbers of people with specific skills, 2) the people who will satisfy these needs, and 3) the training they will need. Arbitrary quotas will carry us in the right direction for a while, but as soon as possible we must tailor training plans to the needs of each individual and each operation, and not be satisfied with an arbitrary quota approach.

The net results of the 5 per cent quota system are hard to During the first half of the colondar year 1955, the 5 per cent ratio was evaluate. In defense of the plan General Cabell said, "It is a tangible way of demonstrating that training is an important part of our business, and that we must pay the price for it by deveting manhours to it... We have provided our executives with a tool -- with an understood and specified standard, below which they are not supposed to fall." The General recognized that the had the dedate. artificial plan did-not-solve-all-of-the-training-problems. The fact that stimulation of registration of students the laurence specificated mining/did not reconcily mean that the trainig program was better than it was before. The operathousal courses designed to meet pressing requirements did not have larger enrollments than before. Some executives tended to send to training those who could be spared and to hold back on those who needed special training on the ground that they were indispensable. Some offices used external training credits which
